Spectral Color Engine

The Hydra 40-Patch Profiling Chart

2-5 Min. Profiling & Spot Color Matching
IT8-Level Accuracy
ROI in 1 Job

A NEW DAY FOR COLOR

Hydra Profiling®

Profile any CMYK or ECG color printing process in minutes!

Makes color management easy, fast, and accurate with intelligent data analysis and patented spectral prediction. Delivers precise ICC profiles using minimal patches; saving time, cost, and effort while ensuring consistent color quality.

HydraFix®

Easy and fast color profile updating for digital printing!

Super-fast and easy, IT8-level accurate color profile updates are yours as HydraFix automatically updates inkcut, linearization, and ICC profiles in one step. Powered by Hydra spectral prediction, HydraFix restores perfect color accuracy on any substrate, saving valuable production time and maintaining ISO/G7®-compliant results.

HydraSpot®

Easy and fast spot color matching for digital printing!

Brings easy, fast, and accurate spot color matching to your workflow. Using Hydra Spectral Prediction, HydraSpot® achieves $\Delta E < 1$ without tedious re-calibration and re-profiling, ensuring flawless, repeatable spot color reproduction across all media.

“The process is not only faster; the quality is orders of magnitude better.”

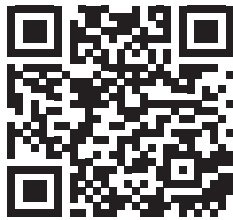

Michael Oostdyk, CTO, Sttark
